### Drupal 7 note

When installing Views on Drupal 7, you absolutely must have [CTools](#) of at least alpha4 and you may need to flush cache as much as twice. **There are currently issues with core's cache flushing that means one cache flush isn't necessarily enough.** Also, if your CTools' version is older than CTools 7.x-1.0-alpha4 things will crash a lot..

### [Wysiwyg](#)

Posted by [sun](#) on October 1, 2007 at 10:24am

No other Drupal module is required. **Wysiwyg** module is capable to support any kind of client-side editor. It can be a **HTML** editor (a.k.a. **WYSIWYG**), a pseudo-editor (buttons to insert markup ... editors are supported (see below). **Wysiwyg** module also provides an abstraction layer for other Drupal ...
